

IMPLEMENTING SOLUTIONS TO MAXIMIZE PERFORMANCE

METHODOLOGY WITH REWARDING RESULTS

Automotive, Pharmaceutical, Food and Beverage... Reaching your potential relies on finding efficiencies that ensure high productivity. With CORE 5, production and maintenance challenges will no longer compromise profitability.

Monitoring, Data Collection, Control, Quality and Performance Management. CORE 5 combines comprehensive analysis and applied expertise to provide you with practical execution of innovative solutions.

The Nexus **CORE 5** PROCESS

ASSESS

Nexus advises clients in determining requirements for planning, selecting hardware and software, and identifying additional tools necessary for proper implementation.

PLAN

To define the project's critical path and avoid costly delays, Nexus and the client work closely to develop an implementation strategy.

EXECUTE

Nexus manages each project in line with the highest industry standards including ISA-88, ISA-95, IEC 1131 Sequential Function Charts.

EVALUATE

Upon project completion, Nexus evaluates the performance of their production process using techniques known in market analysis and OEE, KPIs, Historical Information, SPC, etc.

IMPROVE

Nexus strives for continuous improvement of client plants by implementing projects that follow manufacturing philosophies, such as Lean Manufacturing and Six Sigma.
